ActronAir

At Home with NEO

NEO control series is our most advanced integrated home air conditioning control platform yet. NEO's high quality components, sleek modern design, and easy to use interface sets a new standard for air conditioning control.

Intuitive Interface

Designed specifically for everyday use, NEO's custom interface is easy to navigate, intuitive to understand, and simple to use.

NEO Connect App

Included as standard with the NEO control system, NEO Connect allows you to control your system via your mobile or tablet from almost anywhere in the world.

YourZone

YourZone allows you to manually adjust the airflow to your zone, so you can enjoy the room at the temperature you like.

Comfort Your Way, Room by Room

With zoning built in as standard, NEO lets you manage every area of your home from one easy-to-use Touch Controller. You can even customise zone names to suit your home.

Meet the NEO Family

Built to Grow with You

The NEO control range brings the best in air conditioning controls that will evolve with you and continue to adapt and grow into the future. The NEO family of controls comes packed with all the standard features you would need. When paired with the **ADVANCE or AIRES** system, the NEO can also deliver different temperatures in different rooms at the same time to suit every Australian lifestyle.

Over-The-Air Updates

Software updates happen securely and effortlessly via Wi-Fi, ensuring your controller and system always have the most recent software version.

Intuitive Interface

Our thoughtfully designed user interface is simple, intuitive and easy to use.

Precise Comfort Control

Set your temperature in 0.5°C increments, allowing you to choose the temperature that suits you best.

ZoneAware

Automatically reads temperature only from the zones that are active, so the system responds to only the rooms actually in use.

LED Wall Glow

Unique colour coded LED Wall Glow means you always know when your system's on and what mode it's in.

Integrated Zoning

No need for clunky bolt-on zoning modules. NEO comes with zoning integrated as standard, allowing you to control all of your zones from the NEO Touch Controller. Best of all, each zone can easily be updated with a custom name that suits you best.

Near Field Communication (NFC)

NEO comes with NFC as standard, providing you with quick and easy access to operating instructions - all you need is a compatible smart phone.

Temperature and Humidity Sensor

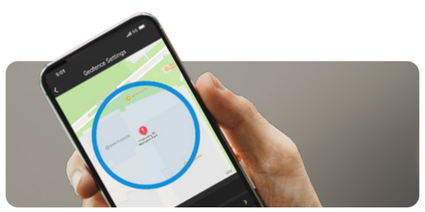

On-board temperature and humidity sensors means the NEO Touch Controller displays precise indoor temperature and humidity levels.

Configurable Proximity Sensor

The proximity sensor wakes the display as you approach, so it's ready when you are.

Stay connected, wherever life takes you

With **NEO Connect**, your comfort is always within reach. **Control your air conditioning from anywhere using your smartphone or tablet**, with smart features that make everyday comfort simple, giving you convenience and peace of mind.

Geo-Fencing

Your ActronAir system switches on as you head home and off as you leave, so you never have to think about it.

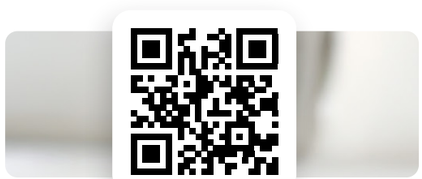

Individual Temperature Control

A temperature for every room, not just the entire house. Available on AIRES and ADVANCE with the NEO Touch Controller.

Comfort Stand

Wirelessly sense temperature where you are. Providing you with the precise and premium comfort exactly where you need it.

Discover the difference NEO can make to your home.

Foot Notes 1 - 7
1. Features may vary depending on the system configuration, model compatibility, and installation requirements. For tailored advice and the most suitable solution for your home, please consult your authorised ActronAir dealer before purchase.
2. Wi-Fi compatibility with 802.11 b/g/n 2.4 GHz .
3. NEO Touch must be connected to Wi-Fi with internet and cloud access. Firmware and app updates may be required to access certain features; availability and timing may vary.
4. Portable stand compatible with wireless Neo Sense and NEO Zone.
5. App features and connected functionality require a compatible device, supported operating system, internet/Wi-Fi with adequate bandwidth, and a supported router. Features may be affected by network conditions, device location settings, outages or third-party service changes.
6. Third-party integrations (e.g., voice assistants) may require separate accounts, subscriptions or devices and are subject to their providers' terms, privacy policies and availability. Features can be withdrawn, modified or replaced at any time.
7. Battery life is an estimate based on typical use; actual life varies with settings and environment.

Disclaimer
