Group Control

The single brand solution making centralised control simple and easy.

ActronAir

Total control **from a single point.**

The ActronAir Group Control allows end users to control multiple ActronAir systems on-site through a single touch screen interface. With its simple and easy to use design, the Group Control makes advanced scheduling functions easy for end users, while its integrated functions and remote access capability ensure it is easy to install and service.

Unlike solutions that use 3rd party controls and components, ActronAir's Group Control has been designed to deliver optimum performance from ActronAir systems, and is covered by a single manufacturer's warranty for absolute reassurance and peace of mind.

Designed with **simplicity in mind.**

While those who install the Group Control are technically literate and fully understand how to use the product, oftentimes the people who use them everyday don't have the same understanding.

That's why our Group Control features an intuitive, easy to use design specially developed with the end user in mind.

Features include:

- ✓ Modern, intuitive design
- ✓ Robust industrial communications, allowing a controls network of up to 500m in length
- ✓ Control of up to 15 units
- ✓ Organise units in up to four groups
- ✓ Easy to setup 7-day, multi-event schedules with support for up to twelve annual special days
- ✓ Retro-fit existing installations, often consisting of multiple controllers
- ✓ Economy Cycle dampers and CO_2 Sensors can be added

Broad support for ActronAir product range

Wall Hung Split
2.6kW – 8.2kW

Multi Split
5.2kW – 13.5kW

Cassette
5.3kW – 13.75kW

Low Profile Ducted
7kW – 12.5kW

Split Ducted
9kW – 71kW

Packaged
15kW – 196kW

NOTE: Group Control not compatible with ActronAir QUE system.

Better **smarts.**

To ensure that end users have the flexibility to program the air conditioning to operate in a way that suits their business, the Group Control comes with advanced scheduling functions, including:

- ✓ 7-day schedule
- ✓ Group after hours
- ✓ Special day planning (e.g. to suit Christmas Day hours of operation)

The Group Control also features programmable outputs for enhanced efficiency, allowing users to add lighting or fans to a schedule – and best of all, without the need for additional controllers.

Complete control **at your fingertips.**

The Group Control has an inbuilt webserver that can be connected to an existing IP network to permit easy remote monitoring and configuration using a web browser. This allows a service technician to operate the unit using a smart device or laptop from anywhere with an internet connection.
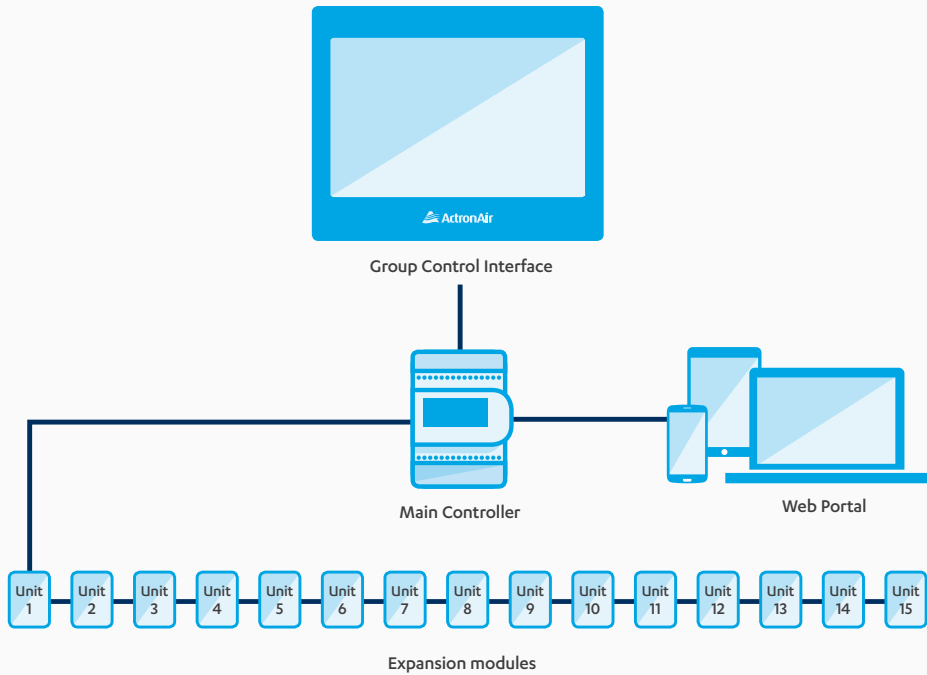

Better **installation & servicing.**

With so many integrated control functions, installation of the Group Control is greatly simplified with our factory supplied wiring and connection instructions, as opposed to the additional wiring and design that a bespoke solution of many components requires.

Additionally, technicians can access an easy to use Web Portal for remote oversight, allowing them to monitor the performance of the system without having to visit the site.

Local service **you can count on.**

Our National Service Network has service staff on the ground and parts on the shelves. They're friendly, reliable and prompt. Furthermore, ActronAir's 2 year warranty will keep you comfortable with absolute peace of mind.

ActronAir

That's better. That's Actron.
