

ASPIRE

Perfect solution for tight spaces

Designed to fit your home, and your lifestyle.

Not all homes have generous ceiling space—but that shouldn't limit your comfort. ASPIRE's compact indoor unit is designed to fit into spaces as low as 245mm, making it a perfect solution for modern homes, townhouses, or renovations where ceiling room is tight. Now you can enjoy ducted comfort without compromising on space or design.

Comfort that Adapts with you.

ASPIRE intelligently adjusts its airflow in real time to keep your home feeling just right. Using smart air volume control, it fine-tunes the fan speed to maintain steady airflow—even as room conditions or air pressure changes—so you enjoy consistent comfort in every space.

Built for Aussie Conditions

Built to handle our country's toughest weather extremes, ASPIRE delivers reliable comfort from -20°C to 50°C.

Smarter Indoor Design

The indoor unit can be installed horizontally or vertically, offering more flexibility to achieve a perfect fit.

Effortless Maintenance, Cleaner Air

ASPIRE's magnetic filters make cleaning effortless—just snap off, clean, and reattach for fresher air and a system that stays performing at its best.

Personalised Comfort in Every Room.

Only heat or cool the rooms you're using. When paired with the NEXUS Touch Controller, ASPIRE lets you divide your home into personalised zones—each with its own temperature control. Enjoy customised comfort in every room, reduce energy use, and save on running costs.

R32 LOW GWP REFRIGERANT

ASPIRE

Perfect solution for tight spaces

Breathe Cleaner, Healthier Air.

With ASPIRE's built-in i-Clean Self-Cleaning Technology, you get cleaner, healthier air while reducing the need for frequent servicing. The system actively removes dust and debris from the indoor unit, helping improve indoor air quality and system efficiency—so your family breathes fresher air every day.

Sleep Soundly, Save Energy.

ASPIRE's Sleep Mode gradually adjusts the temperature by 1°C each hour for the first two hours, then maintains your preferred setting for seven hours before turning off automatically. By gently adapting to your body's natural sleep rhythm, it helps you rest comfortably through the night while reducing unnecessary energy use.

Efficient Technology

Powered by an inverter rotary compressor and advanced DC technology, ASPIRE adapts to your lifestyle and the seasons—delivering consistent comfort with energy-saving efficiency.

Fast Comfort, On Demand

When the weather turns extreme, Turbo Mode boosts output for rapid heating or cooling—delivering powerful comfort right when you need it most.

Comfort that Stays with you.

Follow Me feature uses the remote control to sense the temperature where you are, not just at the unit—keeping you comfortable no matter where you are in the room.

Smart Control, Your Way.

With ASPIRE, you're always in control—whether it's through the sleek wired wall controller with built-in Wi-Fi, the intuitive NEXUS TOUCH controller, or the Easy Connect app on your smartphone. Easily adjust temperatures, set schedules, and create the perfect comfort wherever you are.

ASPIRE

Your Home, Your Climate, Your Way.

Specification Tables

Features	
Inverter Single Rotary Compressor	2-Way Indoor Unit Installation (Vertical & Horizontal) - 7kW to 14kW
Powder Coated Panels - Outdoor	Splittable Indoor Unit - 17kW Unit Only
Hydrophilic Gold Coating Indoor & Outdoor Coils	Rear & Bottom Air Intake Options - 7kW to 14kW
Self-Diagnosis & Auto Protection	I-Clean Feature
Fire Proof Electrical Box - Indoor & Outdoor	Real Time Constant Airflow
Return Air Sensor Included in Unit	Dry Mode
Incorporated Drain Pump with 1000mm lift	Eco Mode
Magnetic Filter - 7kW to 14kW	Demand Response Ready

Controls Features

Foot Notes

⁽¹⁾ Measured and tested in accordance with AS/NZS 3823.1.4. Rated Load Amps shown above is based on MEPS representative outdoor and indoor unit combinations.

⁽²⁾ EER = Energy Efficiency Ratio (Rated Cooling / Heating Capacity)

⁽³⁾ COP = Coefficient of Performance (Rated Cooling / Heating Capacity)

⁽⁴⁾ Input power includes indoor fan kW.

⁽⁵⁾ As per standards of the performance of electrical appliances AS/NZS 3823.1.4.

⁽⁶⁾ Refer to AS / NZS 3000 "Australian / New Zealand Wiring Rules" for more details.

⁽⁷⁾ Outdoor sound pressure level is determined in an anechoic chamber and may differ once the unit is installed due to environment conditions.

⁽⁸⁾ Determination of Sound Power Levels of Noise Sources per AS1217.2.

Rated Conditions

Cooling: 35°C DB Outdoor / Air Entering Indoor 27°C DB, 19°C WB

Heating: 7°C WB Outdoor / Air Entering Indoor 20°C DB

Important Notes:

- The Local Electricity authority may require limits on starting current, running current and voltage drop, please check prior to purchase.
- When the outdoor temperature exceeds the rated conditions, the cooling/heating capacities may decrease the rated nett values.
- Specifications subject to change without notice
